ABOUT ME

Computer Engineering graduate from Marmara University with hands-on experience in game development since 2020 and professional experience since 2022. Specialized in Unity-based development for mobile, PC, and cross-platform games. Contributed to both small-scale and large-scale online projects, including systems where we developed custom server infrastructure. Continuously expanding expertise in game architecture, design patterns, performance optimization, and third-party tool integration. Passionate about creating scalable, maintainable, and engaging gameplay systems.

EDUCATION

Marmara University
Computer Engineer
2018 - 2024

LANGUAGES

English - B2

TAYFUR ŞAFAK GENÇAY

Game Developer

EXPERIENCE

JUNIOR GAME DEVELOPER

Organica Games | Dec 2024 - Present

- Built various core gameplay mechanics
- Applied performance optimization techniques
- Used Unity Addressables for asset management
- Structured project with Assembly Definitions
- Worked with ScriptableObject-driven data architectures
- More technical details available in my portfolio
- https://store.steampowered.com/app/2994190/Money_Simulator/

JUNIOR GAME DEVELOPER

Jib Games | Jul 2022 - Jan 2023

- Multiplayer Game Development
- Dependency Injection
- Strangeloc
- Addressable
- Cross-Platform Development
- <https://store.steampowered.com/app/1479480/Polity/>

GAME DEVELOPER INTERN

Jib Games | Apr 2022 - Jul 2022

FULL STACK WEB DEVELOPER INTERN

Istanbul Büyükşehir Belediyesi IETT Bilgi İşlem | Jul 2021 - Sep 2021

MSQL, HTML, CSS, ASP.NET, ASP.NET Framework,
ASP.NET Core, Django, MVC structure,

★ SKILLS

Design Patterns

Abstract Factory, Factory, Decorator, MVC, Strangeloc, Builder, Service Locator, Strategy, Event Bus, Observer, State, Object Pooling, Singleton

Multiplayer

Riptide Networking

Tools & SDKs

Discord SDK (Rich Presence)

📁 PROJECTS

Polity

Worked on this multiplayer sandbox life simulation game during my time at Jib Games. Released on Steam and mobile platforms.

Money Simulator

Contributed to the design of diverse gameplay mechanics while working at Organica Games. Released on Steam.

Strattle

Custom-built lobby and multiplayer system was developed using Riptide Networking. The integration with Discord SDK enabled real-time display of lobby data such as player count. The project also featured a simple server-side AI system for added gameplay dynamics

First-Person Shooter

A fully handcrafted first-person shooter developed from scratch—no templates or premade assets used. All core systems, including character animations, shooting mechanics, and weapon behavior, were custom-built to ensure full control over gameplay feel and design

Casual & Hyper-Casual Projects

Developed a variety of mobile game projects across multiple genres, continuously expanding my skills and adapting to diverse gameplay mechanics. These experiences allowed me to deepen my understanding of mobile platforms and player engagement through hands-on development.

Detailed technical information about these projects is available in my portfolio, and additionally, gameplay videos can be found on my YouTube channel.
